

## Eleven Face Voters For Four Offices

Astwood and Matthams Contend for Presidency of Council

### FOUR ELECTED BY ACCLAMATION

Call, Picard, Edson, Collard, Klein, Urquhart, Sellar, Littlefield, and Paterson Nominated For Other Positions—McTeer, King, Edmison and Crossland Returned Unanimously

Students will be exercising their franchise when they cast their votes in the election of the major executives of the Students' Society today. Voting will be between the hours of nine and six and will take place in the Union.

There are eleven candidates for five offices as follows, namely, two for the Presidency of the Students' Society, two for Secretary of the Union, three for the Vice-Presidency of the Debating Union Society, and four for the two student positions on the Athletic Board.

The following are the biographies and principles of the candidates:

For Presidency of Council

Millard Astwood has taken an active part in student activities. He came to McGill in 1923 and obtained his B.A. degree in 1927, when he entered the faculty of Medicine. Astwood is now president of his class in Medicine, a member of the Osler Society and treasurer of the Medical Undergraduate Society. In 1925-1926 he was associate editor of the Annual, and represented Medicine in the Scarlet Key in 1927-28-29. He has taken a prominent part in athletic activities as well. He was a member of the swimming teams of 1924-25-26 and the water polo teams of 1925-26-27.

Astwood stands for judicious decentralization of organizations under the Students' Council, so that all societies may have the freest scope possible in their activities, consistent, of course, with the interests of the student body as a whole. What the council needs, above all, is co-operation among its members.

Phil Matthams is the present Editor-in-Chief of the Daily and has

## Arts '31 Lunch To Hear Prof. Matthews

Dance and Banquet to be Discussed at Meeting Tomorrow

T. H. Matthews, M.A., Assistant Professor of Mathematics and Assistant Bursar of the University will be the speaker at the Arts '31 luncheon which will be held in Krausmann's cafe tomorrow at 1 o'clock.

The committee in charge, Bill Sprenger and Bert Costello, report progress in ticket sales, but they have a large number left, which will be procurable today and tomorrow afternoon, or even at the cafe, though those in charge wish all tickets to be taken early so that an estimate of numbers may be made.

Besides the main speech, two short reports will be heard from the committee which was to investigate as to the feasibility and desirability of holding a class dance. A vote will be taken on this function, and a committee will be named to take charge of the class banquet which it was decided to hold at the last luncheon.

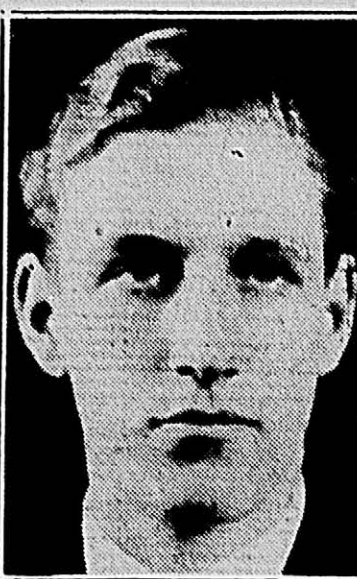

## LIBRARY SCHOOL BACK FROM TOUR

Visited Institutions in New York and Vicinity

McGill library school students returned to Montreal today after completing a 10-day survey of libraries in New York and vicinity. The party of 13 was under the charge of Mrs. Mary Duncan Carter, assistant director of the school.

The students visited 20 libraries, including the main building of the New York Public Library system.

## Presents Revue

DOUGLAS R. OGILVIE, producer of the 1930 edition of the Red and White Revue which opens tonight in Moyse Hall.

## Bill Would Help Tourist Trade

Canada Should Uphold Her Reputation

### SPEECHES MADE

Edson Acts as Critic of Debates and Speeches

If the liquor bill is passed the increase in tourist trade will more than make up for the resulting loss to the country in revenue duties, stated Gib Craig in one of the Commerce '32 debates yesterday afternoon when he claimed that "The liquor export bill at present before the House should be passed." Before the debate four speeches were given by Allison, Crabtree, Saunders and Smellie.

Bowman the first speaker for the affirmative, emphasized the fact that Canada should not stoop to ignoble methods merely for the sake of revenge. It is the duty of Canada to uphold her fine reputation and the liquor export bill affords such an opportunity. The loss in revenue would amount to but 7 millions a year.

Goodman, the second speaker for the negative, claimed that as the liquor would reach the United States in spite of the export bill he knew no reason why Canada should forego the revenue collected from the legal recognition of liquor exportation. The passing of the bill would, as well, throw many of work at a time when unemployment was a grave problem.

Would Come any Way

Graig, for the affirmative, stated that the bill would be a boon to the country insofar as the thirsty citizen of the United States would come to Canada for his liquor instead of waiting until Canada sent it to him.

(Continued on page four)

## Arts '32 To Hold Finals On Thursday

Alchin and Lusher Oppose Currie and Cerine

After a successful season the Arts '32 debating club will bring its activities to a close when the final debate is held on Thursday. The chairman, Reg. Anderson has handled the debates efficiently all through the year. Forty men participated in the debates and all can bear witness to the easy grace and good nature of the chairman. Moreover the twenty teams are all to be heartily congratulated on the high standard of the debates. The judges were unanimous in their praise both of the victors and the vanquished.

The finalists Alchin and Lusher, Currie and Cerine, will meet on Thursday afternoon at 4 P.M. in Room 79 of the Arts building.

The whole class has liberally contributed towards the fund for prizes, and the Chairman has sworn his famous oath that these prizes will be worth the having.

They were especially impressed with the Children's Library in Brooklyn where they saw scores of boys and girls enjoying reading facilities created especially for them.

Accompanying the students in addition to Mrs. Carter were Miss M. V. Higgins, of the library school staff and Miss Grace Reynolds, secretary of the school.

## Recent Progress Of Haiti Due To French Influence

Dr. L'Herisson and Prof. McCullagh Addressed Final Meeting

### OFFICERS ELECTED

William Eakin to be President of Cercle Francais Club for Ensuing Year

"If the Republic of Haiti has progressed at all in recent years, it is due to the influence of the French clergy and professors," stated Dr. L'Herisson at the final meeting of the Cercle Francais, held last night in the Tea Room of the McGill Union. Dr. L'Herisson, the first of the two guest speakers for the evening gave a brief but interesting talk on the Republic. Following him, Professor McCullagh described some of his travels through the French Colonies in Africa during last summer's vacations.

As the meeting was the last for this term, the officers for the ensuing year were elected. William Eakin will succeed Ronald Rowat as President of the Club while Pierre Weissenburger was elected Vice-President. Wilfred Barnes will take over the duties of Treasurer and Andre Leroux will fill the position of Secretary. The retiring president thanked both the members and the executive for their support during the last year, and in closing gave a few hints to next year's officers. The members of the staff of the French Department also offered some suggestions. It was decided that next year, written invitations would be sent out, advising students of a coming meeting of the Club. Professor Villard was asked to be Honorary President for next year and Mr. Lemaitre and Mr. McCullagh were elected joint Honorary Vice-Presidents.

Republic Of Haiti

Dr. L'Herisson said that he was glad to speak to students of McGill

(Continued on page two)

## Modern Home Is Domestic Need

W. E. Germain and J. D. Sutherland Explain Importance of Modernization

"The Home is the keystone of the family," stated W. E. Germain, in an illustrated lecture on "Home Modernization in Cities" given in the Chemistry Building lecture hall last night. The other speaker of the evening was Mr. J. D. Sutherland.

"Every man's first duty to his family is to own his own home," continued Mr. Germain, "to own his own home makes a man more civic conscious, and consequently elects men to public position who are of high moral and sterling reputation."

Home Is Investment

Home is the best investment any man can make. It is not influenced by the turn of the stock market or is it an investment like a car where by the time that the last installment is paid, the car is a piece of junk that no one wants. Home pays big dividends every year in happiness and solid comfort.

Many homes have to be modernized. Of the untenanted homes in Montreal every year 80 or 90 percent of them are empty because they are not kept up to date. Owners of old homes need suggestions and the league with the Canadian "Home and Community Beautiful" tries to offer the suggestions.

He then illustrated by the use of coloured slides old homes of Ontario, Quebec City and Montreal made into new.

Shows Slides

D. S. Sutherland following along on the same line gave slides on landscape gardening illustrating the League work on the "Model Cottage".

A moving picture was shown on the London Model Home, through the courtesy of the Canadian Pacific. The Chairman Mr. Livingston then moved a vote of thanks to the speakers, and to the members of the league.

### Altruism

Today's rehearsal is taking place in the Ball-room of the Union at 4 P.M. Will all the members of the cast please attend.

## A. J. Nesbitt To Address Christian Union Tomorrow

THREE addresses will be given at the next meeting of the Evangelical Christian Union to be held in the music room of the Union tomorrow. The speakers will be Mr. A. J. Nesbitt, of Montreal, Mr. F. N. Palmer B. A. (Oxford), of Toronto, and Mr. Kenneth Hooker B. A. (Cambridge) of London England.

The Evangelical Union is a new undertaking at McGill. The basis of membership very liberal. Each new member pledges himself to "that in joining this union I declare my faith in Jesus Christ as my Savior, my Lord, and my God. Its purpose is as follows: (1) To witness to the Lord Jesus Christ as Savior, and God, and to seek to lead others to a personal faith in him.

(2) To deepen the spiritual life of members and strengthen them in a life of faith by the study of the Bible and by prayer.

Both men and women students of the university are invited to attend.

## Arts Debating Judges Named

Interclass Championship Will be Decided Next Wednesday

### SERVE HOT DOGS

Musical Numbers and Campaign Speeches Also Figure on Smoker Program

Dean Ira MacKay, of Arts, and Professor Carleton W. Stanley of the Classical Department, are two of the three members of the faculty who will judge the final Arts Interclass debate, which will be held in the Union Ballroom, on Wednesday evening, March 13th. The other judge will be announced in a few days.

This contest will be only one of several features on that evening. Musical numbers, speeches from the candidates for positions on the executive of the Undergraduate Society for next year, free smokes and hot dogs and coffee will also be included. The president, Alastair Watt, will present a report of the year's activities.

Fourth versus First

Lionel Rubin and Ted Johnson of fourth year will meet Charles Sturdee and Arthur Marshall of first year, as affirmative and negative respectively. In the dispute, "Resolved that McGill students are lacking in a sense of humor. Other plans are under way but will not be released for a few days.

Nominations of candidates for the

(Continued on page three).

## McGilliad Almost Entirely Sold Out

Production of Second Number This Term is Ensured

The phenomenal sale of the McGilliad, exceeding all expectations, has ensured the production of another number before the end of the present term. Everywhere the magazine has been eagerly bought. In the bookstores and the Medical Building only a few copies are left, while every one of the fifty copies placed for sale in the Engineering Building has been sold.

However, it is in the Arts Building and the Tuckshop that the McGilliad has been most enthusiastically received. There the Arts men have bought the complete supply of three hundred copies. In other words, about a third of the eleven hundred students in the Faculty of Arts have now purchased a copy. This gives the record to Arts. Second to it comes the Faculty of Applied Science where about one student in six has bought one.

The others, and all other who have not yet obtained their copy, may do so now; for a fresh supply is to be offered for sale at the Arts Building and Tuckshop today.

## SELL LIBRARY OF LATE DR. RUTTAN

Property of Former Dean Goes to Hammer

There will be an opportunity for students to pick up books of a scientific nature this afternoon when the property of the late Dr. R. P. Ruttan, former head of the Faculty of Grad-

## Aristotle Showed Scientific Method In Biological Role

Readings From Osler and Paper on Aristotle Read at Society

### IS LAST MEETING

Dr. Francis and F. L. McNaughton Were Speakers of Evening

Gathering for the last regular meeting of the year in the Ritz-Carlton Hotel, members of the Osler Society last night listened to a reading from Osler on Burton's Anatomy of Melancholy, given by Dr. Francis, and a paper on Aristotle's given by F. L. McNaughton.

Burton, who wrote during the early part of the seventeenth century, was one of Sir William Osler's favorite authors, sharing with Sir Thomas Browne the post of honour on his book shelves. Osler described the "Anatomy of Melancholy" the best textbook of Medicine ever written by a layman.

McNaughton treated Aristotle from the point of view of his achievements in Biology, in which the old philosopher was keenly interested. Many of Aristotle's ideas were essentially correct, he pointed out, and the keenness of his observation was such that little escaped him that was discoverable without the aid of the microscope.

Dr. Oertel, who was present as the guest of honour of the evening, congratulated the author of the paper on both the excellence of the selection of the material and the conclusions that were drawn concerning this man, who has occupied an unparalleled position in the world of thought since his time.

"Anatomy of Melancholy."

Dr. Francis explained that Sir Wil-

(Continued on page three).

## Commemorated Death Of Taft

Memorial Service Was Held Yesterday at Church of Messiah

Several officials of the University were present at the Memorial Service held at the Church of the Messiah yesterday afternoon in honour of ex-President W. H. Taft. There were also officials of the city among those present. W. Frost, United States General Consul addressed the gathering.

"All day long throughout the United States, at half-hour intervals, the guns have spoken of the grief of the American people," said the Consul General in his address, "and at five o'clock on a Virginia hillside overlooking Washington the last Presidential Salute was fired for William Howard Taft."

"Mr. Taft's addresses were replete with public tributes to Canadians. 'Our good neighbours . . . a people of broadly patriotic views, energetic efforts, friendly sentiments.'"

"He was born 73 years ago in the very heart of the American nation, almost within a hundred miles of the birthplace of Lincoln. At the age of 51 he became President of the United States, only 8 years after he had quitted the judicial life for the executive."

"It was while he was in Montreal engaged in the Grand Trunk Railway arbitration, that he received notification of the appointment which he valued most of all, chief justice of the United States."

Among those present were, Sir Arthur Currie, Dean MacKay, Alderman Drummond representing the city; Mrs. J. C. Laird, President of the American Women's Club in Montreal; Commissioner of Immigration; Judge H. R. Landis; American Trade Commissioner E. G. Sabine; Commander of the American Order of Foreign Wars, Major W. H. Wardwell, and the members of the staff of the United States Consulate General.

Books studies and research is sold by auction at his residence at 1374 Sherbrooke Street this afternoon.

The sale begins at 2:30, but the library will not go to the hammer till about two hours later. The books are of a general scientific nature with a slight predominance of those on medicine. There are also several sets of interest to the general literary.

## Manages Show

STUART WEBSTER, who is Business Manager of McGill's eighth annual musical show which will be shown for five performances.

## Stresses Value Of Discoveries

Rutherford Was One of First Wireless Experimenters

### STARTED EARLY

Former Professor at McGill is Noted For Work on Radio-activity

The life and work of Sir Ernest Rutherford was the subject of Dr. A. S. Eve, when speaking last night at the MacDonald Physics Building. The lecture was one of the series on famous British Physicists. Sir Ernest Rutherford is one of the best known of modern scientists. His most extensive, best known and productive work has been that on research in regard to radio activity and radium. At the commencement of the meeting Dr. Eve announced that Dr. Barnes would deliver the next lecture of the series Tuesday night.

### Science Renaissance

Dr. Eve commenced the lecture by explaining that the last thirty or thirty-five years has practically been the Renaissance of science. The Greeks, before the birth of Christ, were very well versed in mathematics especially trigonometry and geometry. Later science again blossomed out during the time of Galileo, Copernicus and Newton. Today science is making vast forward steps.

### Has Noted Career

Sir Ernest Rutherford was born at Nelson, New Zealand. At an early age he began to show the characteristics of a genius. A genius as Dr. Eve explained, was in his mind, a man possessing insight and imagination, all of which Rutherford possesses. He passed his school days at Nelson College, and on graduating won the "1881 Exhibition" Scholarship at Cambridge. From 1893-1907 he was MacDonald Professor of Physics at McGill, and from 1907-1918 he carried on research work at Manchester. He became a professor at Cambridge in 1918 where he still is. He wrote many books on radioactivity and such like. Many of the pamphlets that he wrote while a professor at McGill, which explained his theories, are practically without fault.

### Preceded Work of Marconi

Sir Ernest Rutherford, while still a student at Cambridge, was intensely interested in experiment, involving many of the principles later used by Marconi, in his invention of the wire-

## Graduates To See Tonight's Revue Showing

Successful Dress Rehearsal Held Last Night in Moyse Hall

### CHORUS FEATURED

Tickets For Sale For Cabaret at Windsor Hotel Saturday Evening

Tickets for tonight's graduate performance of the Red and White Revue are available to students today, and will be sold at the wicket in the Union and at the door this evening.

The last rehearsal of the Revue was held last evening and all the performers went through their parts in a finished manner.

This year's Revue is featuring the chorus, and it appears in many well-executed song and dance numbers. The costumes and the scenery are exceedingly attractive and effective, particularly those of the opening chorus. Outstanding among the chorus numbers are "Kicking High" and "A Country Idyll" in which a cow appears.

### Many Amusing Skits

There are several amusing skits, one of which represents Julius Caesar, Napoleon and Washington holding a discussion, in the midst of which Cleopatra enters. A clever sketch satirizes the rulers of the modern world from the king of the Zulus to Mussolini.

One of the most humorous acts pokes gentle fun at well-known campus characters, causing much amusement to those in the know.

Some of the dance numbers were tried out at the Plumber's Ball and were enthusiastically received by the audience. Among these is the College Stomp which is played from time to time and proves popular.

### Good Singing

Some good singing is done in a medieval castle. In this skit much laughter is caused when the irate father of the fair princess comes on the stage in a nightshirt, and interrupts the love-making of the ardent lover.

Members of the M.S.P.E. do a specialty dance, which is characterized by faultless precision.

### Cabaret on Saturday

All tickets for the Red and White Cabaret have not yet been sold. Reservations may be obtained at the Union Tuckshop or from the maître d'hotel at the Windsor. Tables will be reserved for parties of two or more. Dancing will begin at ten o'clock for the benefit of those who do not attend Saturday night's performance of the Revue, and will not stop until later than last year. Many of the hits of the Revue will be presented at the cabaret.

## Commerce '31 Will Hold Eliminations

Winners This Afternoon Will Enter Semi Finals

After many postponements the Commerce '31 Debating Society will resume operations. The two speakers Shackell and Hutchison will oppose Collins and Girard, on an unknown subject. The debate will take place in the Commerce reading room at 6 o'clock. A win for either team will give them the right to enter the semi-finals against Cohen and Victor.

The subject will be chosen by the popular method known as the "Hat Trick" system. That is, various subjects are placed in a hat and one is picked out on which they are to speak. In this manner the debate becomes more or less impromptu speaking. This system has been used by most of the debating clubs in the college and has proven its popularity in every case.

H. Carl Goldenberg will judge the debate. Mr. Goldenberg has, in the past, represented McGill in Intercollegiate contests. As there will be no delay in getting started the speakers are requested to be at the Reading room at 4 P.M. sharp.

## Labour Club to Hold Last Meeting Tuesday

Next Tuesday the last meeting in the 1929-1930 session of the Labour Club will be held in Strathcona Hall at 8 P.M. As this is the final meeting there will be an election of officers for the session of 1930-1931. Dr. Gifford will address the members on the topic "War and Peace."

## Election Day

TODAY students decide once more just who is going to represent them on the various committees and boards connected with the efficient functioning of student government. It is imperative that every McGill student come out and vote. Everyone can find a few moments, even in the busiest of days, in which to cast his vote in favor of one side or the other. It is not asking much of a student to see that his opinion is represented in the final count which decides whether a candidate shall hold office or not. In a community the size of McGill every vote counts and one or a very few votes may decide the issue for one side or the other.

In casting their votes students should remember that they are supporting a definite policy of student government. The candidates for the various positions outlined their platforms more or less definitely at the Election Smoker which was held Monday afternoon and either from having been present or from the report in the Daily students should be familiar with the opinions of these men. There are some vexing questions to be settled by next year's executive and by voting one way or the other students will be helping to settle them.

The paramount issue of centralization or decentralization will be settled at today's election when students support the various candidates in favor of either policy. For these reasons it is necessary that every student vote so that the successful candidates may feel that the full force of student opinion is behind them. And students had better think before they vote. The blind vote is worse than no vote at all. The ballot must be an honest expression of the student's own opinion and nothing else. Above all beware of scare slogans and bogies.

A full turn-out of voters will help the candidates greatly for they will be handicapped during their terms of office by the thought that they are supported by only a minority of the students because the greater part of them were either too lazy or too indifferent to vote.

## On With The Show

TONIGHT'S showing of the Red and White Revue will be more or less in the nature of an experiment. Not only will the production be shown for the first time in Moyse Hall but it will also be shown for the first time on a night reserved for the Graduates' Society. Last year there was some talk of discontinuing the Revue because the show was deteriorating from the high standard set in previous years and because rowdiness was creeping in, especially at the Saturday night performances when students were inclined to show their enthusiasm and exuberance in a rather forceful and unrestrained manner.

Though no rowdiness is expected to occur tonight among the sedate graduates the success of their Revue will depend on the performance given. It will prove whether the Revue can be successfully performed on a stage the size of that in Moyse Hall Theatre and students will be inclined to judge from the success of this performance. Of course there will be the ordinary slips incidental to a first night performance on any stage but tonight the question of whether the Revue can be given in the Moyse Hall will be settled once and for all.

If the show proves a success from the students' point of view it will also have to prove a success from the point of view of the graduates. If the graduates are satisfied they may demand a night to themselves every year and we are sure the Revue Committee would not refuse their flattering offer. Due to the smaller capacity of the Hall as compared with His Majesty's Theatre the financial success of the Revue may depend on the graduates.

Thus in more than one way the fate of the Red and White Revue hangs in the balance tonight. May the producers and actors be successful!

# The BOOK SHELF

## Old Plot Handled In Masterly Style

PASSION FLOWER by Kathleen Norris. Doubleday, Doran & Gundy. pp. 312. \$2.00.

We sincerely hope that this latest effort from the pen of the talented Miss Norris will be banned as a menace to the national safety. Not that it is marred in any way by the type of situation which appears to exhilarate the worthy burghers of Boston, but on the ground that it could be too easily made into an Al Jolson comedy, complete with dying child and broken-hearted daddy.

It seems almost as if Miss Norris wrote with one eye on the stage and the other on the screen, giving but perfunctory regard to her duties as a novelist. The action is as cut and dried as action usually is behind the footlights; the scenes and acts are clearly noticeable, while the movie-like sequences rob the story of most of its spontaneity and pin the action to the printed page, leaving none of the imaginative gaps which lend much charm to the yarns of the old favourites.

Where are the literary descendants of Dumas, Hugo and Stevenson? Where are the spinners of virile yarns who wrote in those blissful days when every scribbler did not feel bound to solve "problems"? We have been suppressing a desire to sit down at a type-writer and commence a story beginning something like this "Hist the mizzen main-spike, ye swabs," bawled the boatswain of the big black barque "Belinda" as he expertly dropped a long thin, brown jet of tobacco juice squarely between the eyes of a wheeling sea-gull.

Not very elegant, we admit, but, still a change from the vast bulk of everlasting problem piffle which is being put on the market.

A joke we have always admitted to be a joke and have unquestioningly accepted it as such, but after reading our sixty-fourth novel involving the marriage of a rich heiress and her father's chauffeur we begin to feel that a line must be drawn somewhere. Cassy Pringle is a rich young woman held close to the family fire-side by a rather unreasonable father. She becomes infatuated with Dan Wallace and leaves the shelter of the family roof-tree after a scene reminiscent of a good old 1888 melodrama. (But, father, this man is my husband!)

They live happily enough for a time and succeed in complicating matters by adding a son and a daughter to the family roster. But another woman makes her appearance, and divorce follows. Three years pass before Dan makes up his mind that, after all, Cassy was probably the better woman of the two. He returns to her. But his second wife breaks in on the festivities and shoots Dan with a "small silver mounted pistol."

Incidentally, we could take a great deal of pleasure in this last scene if only Al Jolson could be persuaded to act the part of Dan Wallace.

We feel bound, however, to remark that Miss Norris has handled a poor story with a great deal of skill. The characters are very well drawn and what plot there is, is spread out in a masterly fashion.

W.A.B.

## A New Magazine Is Born Unto McGill

"THE MCGILLIAD"—Vol. I, No. 1.  
(K.N.C.)

We require a magazine at McGill. It is one of our Long Felt Needs. I hope that this magazine will survive. It deserves to. The first issue is very promising. Its chief defect is what the editors joyously announce as its outstanding virtue. It has no policy, and consequently is somewhat lacking in unity. A magazine without a policy generally falls into either ponderous decorum or cheap humor. The McGilliad fortunately has done neither. It has succeeded in maintaining an intellectual level and keeping its features well varied. Variety is its outstanding characteristic, but I feel that this variety has been overdone in an effort to make it quite obvious that the magazine is truly representative. Taken separately the features are on a decidedly higher level than those of the average college magazine, but, as I have said, the magazine as a whole is lacking in unity. It has no definite personality. The tendency seems to be slightly towards the intellectual, the humorously cynical. I hope this tendency develops and that The McGilliad has developed a definite policy before the next issue. The editors might do well, as they have obviously not received the support which they deserve from the student body, to write more themselves and disregard the morose wall that the magazine has fallen into the hands of a group.

Dr. Leacock's short humorous article sends The McGilliad off to a good start. "He Ain't Gonna" is a short psychological study in which the stream of consciousness method is employed. The poems, especially "Thaw," are well above the average in magazine poems. "Tabula Rasa" is clever and sardonic. Dr. Hendel's article is worthy of publication in any literary magazine. "In Praise of Illusions" is short, well-written and stimulating.

The article that interested me chiefly was Stanley Lunn's "Virus and Antidote." It is a criticism of English 2. Lunn doesn't like English 2. He calls it names. It is a "grindstone" a "clothes wringer," a "machine." It has a "maw". Personally I liked English 2. The object of the course is to give a sense of literary perspective. It gave me that sense and I am grateful to it. It should do the same for anyone intelligent enough to survive the first year. Lunn's suggestion that modern literature should be studied first is impracticable because we are too near to it to know what is worthy of survival. We can only understand the significance of modern literature by studying the literature of the past, but we cannot understand past literature by a study of modern literature; and past literature is just as living and vital as modern literature.

ture. The message of a great creative mind is essentially the same in all ages, and the years do not rob it of its vitality.

## BEHIND THE LITERARY SCENE

Rudy Vallee, the sax appeal boy who crooned his way to stardom, has written his autobiography. It is called "Vagabond Dreams Come True" and, from all reports, it is just about that syrupy.

The Literary Guild have selected for their April publication "Bystander" by Maxim Gorky, the eminent Russian novelist.

E. P. Dutton & Co. are publishing Dmitri Merezhkovsky's "Michael Angelo, And Other Sketches." He gives a sympathetic picture of the sculptor's unrequited love for Vittoria Colonna.

Dr. Charles A. Beard, editor of "Whittier Magazine" is publishing a similar work entitled "Towards Civilization". Among its contributors are Dr. Sperry, inventor of the Sperry gyroscope; who will write on "Invention"; and Dr. Robert A. Millikan, the physicist, who will write on "Science."

## Collegiana

### The Much Abused Genus Collegian

THE genus, male or female, is an exceptionally interesting study for scientists. Its characteristics are both distinctive and peculiar.

It studies like a friend—on the evening before mid-quarters or finals.

Usually it does not drink, when there is nothing to be had.

It frequently works for a living; more frequently it works hard for a living.

It spends peaceful evenings at home—often as much as one a fortnight.

It is courageous and enjoys the keen zest of competition—ping-pong.

It frequently omits a big party—if a bigger one occurs the same night.

It takes notes and does themes superbly—When the friend's handwriting is legible.

The various members of the genus look pretty much alike, talk alike, dress alike, act alike.

The characteristics of the genus are both peculiar and characteristic.

—The Minnesota Daily.

Editorial plea for the return of the "good old frosh", seen in the Daily Orange of Syracuse University:—

When the academic year opened the campus was dotted with freshmen, some of whom bravely sported a green lid, some of whom seemed a trifle ashamed of this badge of recognition. Now, it is a rare sight to see a green lid worn by members of the first-year class. Where are the freshmen?

Are the freshmen ashamed of the fact that they are students at a great educational institution? Are they ashamed of the fact that they have defeated the sophomores in two of the traditional class rushes? Are they ashamed of being freshmen?

—Rochester Campus.

Addition to the curriculum at Rollins College, which is in Florida, as forwarded to us by the Ohio State Lantern:—

If you want to be bad, you had better enroll early at Rollins College, in the study of Good and Evil. As an advanced course in sociology, this course in good and evil was started this semester, and there is an exciting rush of students to take the course. The teacher of this course might well be dubbed the world's first "Professor of Evil."

## Shooting Stars

"Can any claim that he has never spoken a harsh word to his wife?" shouted the female orator. "Y-y-you're d-d-damn right," said a husband in the rear of the hall.

Minister at dinner: "Well, here's where the chicken enters the ministry!"  
Bright boy of the family: "Let's hope it does better than it did in lay work!"

"I wonder," mused Muriel as the conversation lagged, "where they ever get so many straight trees to make all those telegraph poles out of."

"Goodness, girlie," giggled Gilbert, "did you never hear of a pole-tree farm?"

"Mother, if I get married when I grow up, will I get a husband like my old man?"

"Why, yes, dear."

"And if I don't get married will I be an old maid like Aunt Susie?"

"Yes, dear."

"Well, all I gotta say is, that it's a pretty tough world for us wimmen, isn't it mother?"

## O. K.

The origin of "O. K." is shrouded in some mystery. One learned linguist declares it to be an Indian expression, more properly spelled "Okch" and signifying "giving approval," while a more picturesque explanation insists that the abbreviation is due to a misreading of the initials "O. R." a short cut for "order received," used by shipping clerks. Still another student of language attributes it to Artemus Ward, a famous American humorist, whose whimsical spelling of "all correct" gave some excuse for writing a brief "O. K." Other interesting explanations may also be uncovered in solemn treatises.

The abbreviation "O. K." seems today to have come into a new popularity in America. When an acquaintance tells a friend over the telephone that he will be glad to accept an invitation for dinner next Sunday he crowds his acceptance into a crisp "O. K." When complete agreement has been reached on a proposed business transaction "O. K." is the sign used to seal the bargain. Casual conversation is well seasoned with "O. K." as anyone who has listened to the talk of college students has reason to know "O. K." has become one of the national "yes" words.

Perhaps too frequent use of the abbreviation "O. K." becomes monotonous to the ear, but the gracious mood that prompts it is certainly worthy of more universal emulation. There is too much cross-grained criticism current today. Too many negative and destructive opinions circulate about public institutions and color everyday philosophy of living.

The man who can grasp and commend the other fellow's point of view, and can find the thread of the worth while in every tangled situation—national or international—is the man who by right belongs to that happy-hearted company whose password is "O. K." and whose encouragement, faith and good cheer give a singing strength to the day's work.

## Recent Progress Of Haiti Due To French Influence

(Continued from page one)

about his native country because so very few really know anything about it, and because he was anxious to establish closer relations between the University of Haiti and this college.

"Haiti as everyone knows was discovered by Columbus near the close of the fifteenth century. It was occupied by Spaniards till about 1700 when it became a French Colony. In spite of the bitterness and struggles of the rebellion against French control, Haiti has preserved a kindly feeling towards the mother country. In fact, the people of Haiti might be said to have two patriotisms; one for Haiti and another for France. Haiti is the only Republic in the Western Hemisphere where French is spoken."

"French literature has had a great influence but it has not suppressed the works of local talent. All Haitians are proud to be called French. The older families do their utmost to send their children to France for their education. The relationship has nothing to do with politics. It is simply a cordial feeling that has existed since the revolution."

Before closing his remarks, Dr. L'Hérissou remarked on the absence of any books on Haiti in the McGill Library and said that he would donate some when he had returned home.

Professor McCullagh decided to describe to the members the least known parts of Morocco, Tunis and Algeria, the three French Provinces. His lecture was illustrated by many unusual slides most of which he himself had taken.

"The first ancient city to be visited is Volubilis which is an excursion usually taken by auto from Meknes. Meknes is one of the most picturesque cities of Morocco and if one is not accustomed to Arab life, one can wander forever among its lanes and admire the beautiful examples of architecture which are found there."

"The Roman City of Volubilis lies 31 kilometers from Meknes. Recent discoveries tell us that during the first century Volubilis was a very rich city. No idea can be formed of the grandeur of its ruins which are of the greatest interest without actually visiting the city. The museum contains many articles of great value among which is the famous bronze dog discovered in 1916. It is true that these objects of art could probably not be compared to those of Italy but the examples shown offer striking realism."

The trip to Cherchel is also made by car. Cherchel was once a Phoenician colony. Later on, King Juba 2 enlarged it and called it Caesarea in honour of Julius Caesar. At present the population of the city amounts to only five thousand but its archaeological riches put it in the front rank among well-known cities.

Mr. McCullagh went on to describe in more detail the remaining cities visited during his tour. His command of the French language and his splendid slides made the audience almost feel that they themselves had taken part in the trip.

Only truly fine quality and perfect blending could produce the mildness and fragrance of

# NOMINATIONS

for the following offices of the Science Undergraduate Society are hereby called for:—

President ..... from 3rd year  
Vice-President ..... from 3rd year  
Secretary ..... from 2nd year  
Treasurer ..... from 2nd year  
Asst. Secretary ..... from 1st year

Nominations must be in writing and in the hands of the secretary before Wednesday, March 12, 1930, at 12 noon.

Nominations must be signed by 10 members of the Science Undergraduates' Society.

# NOTICE

Owing to the resignation of MR. GEORGE S. McTEER as Student Representative to the Students' Executive Council from the School of Commerce, nominations are herewith called for from the School of Commerce for their representative to the Students' Executive Council.

Nominations must be in writing and signed by at least 10 undergraduate students registered in the School of Commerce.

Nominees must be undergraduates in the Junior Year of the School of Commerce.

Nominations must be in the hands of the Secretary of the Students' Executive Council by 12.00 noon, Saturday, March 15th, 1930.

Elections will be held on the same day as elections in the Undergraduate Society of the School of Commerce.

G. H. FLETCHER, Secretary.

# Arts And Law Win In Doubleheader—Red Sox Play Science Today

## RED SOX WIN FROM COMMERCE NINE, 13-5

Arts' Final Inning Orgy of Hits Decides Gruelling Battle

LAWYERS WIN, 12-6

Defeat Science Squad in Brilliant Comeback—Game Today

THE Arts Red Sox loom as leading contenders for the inter-faculty baseball crown by virtue of their 13 to 5 win over the heavy-hitting Commerce aggregation yesterday afternoon in the second tussle of a regular doubleheader. In the opener Law took the measure of the Science nine, 12 to 6, thereby breaking into the winning column and at the same time partially atoning for their loss to Commerce on Monday.

Arts last year's champs opened their season as they trotted out onto the High School diamond with only four veterans in the line-up, Cohen, Aspler, Urquhart, and Calhoun being the only members to return to the fold for this year's campaign. The Red Sox were given a great ovation by the mob as they warmed up before the first pitched ball. Cohen looked great on the mound and Aspler held that "speed" ball to perfection behind the plate.

As Empire Erdrich called for play, their season as they trotted out onto the field across the stadium. Commerce won the toss and took to the field. For the first few innings both squads fought closely. Not until the sixth inning did the Arts men take the lead and a final orgy of hits in the last session once and for all put the game on ice. Joe Cohen's three-man strike-out as Commerce came in for their last bats decided the tussle.

The Commerce boys fell heavily before the stellar twirling of Joe Cohen, who struck out fourteen men. Even "Home" McTeer could not connect with Cohen's powerful drives, the Commerce stalwart only getting a single in three times at bat. Talpis, the dollar pitcher, put in a great game considering the fact that he had pitched an entire game the day before.

The line-up:—

Arts (13)	Commerce (5)
Catcher	Bel
Aspler .....	Pitcher
J. Cohen .....	Talpis
Small .....	McTeer
Urquhart .....	2nd Base
C. Ross .....	3rd Base
O. K. Ross .....	Shortstop
Conroy .....	Outfield
Anderson .....	Victor
Doig .....	Taylor
Sellar .....	Grant
Levine .....	Sub
Calhoun .....	Weinstein
French .....	Levine

Score By Innings R. H. E.  
Arts .....

Commerce .....

Batters: Cohen and Aspler; Talpis and Bell.

Lawyers Win

The Law Lions Baseball nine finally hit their stride when they defeated the strong Science outfit by the score of 12 to 6 in the opening game of the doubleheader.

"Duke" Klein, southpaw hurler for the Lawyers, whose arm has been receiving treatment for the last two days was at the height of his form when he pitched an excellent game, besides hitting a circuit clout at the critical time of the game bringing in two base runners with him.

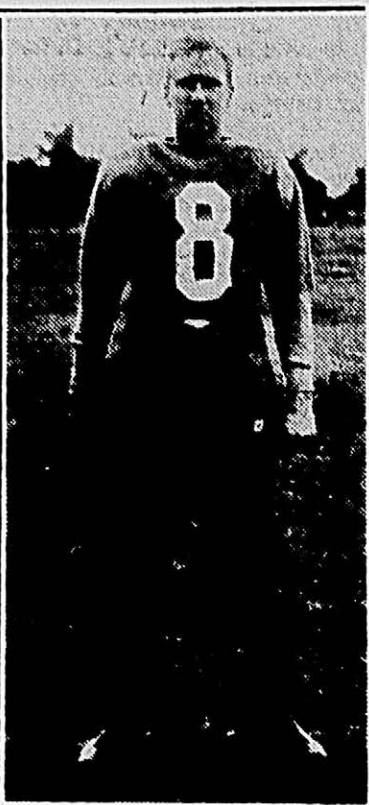

The Plumbers fielded a strong team but their lack of practice told against them and after holding the well-oiled Law Machine for three innings they wilted away under the constant heavy hitting of the Law players.

"Blitz" Blond lanky Law outfielder had a perfect day with the hickory when he smashed out four lovely hits. Morrison, Science first baseman, also put in a fine performance.

The line-up was as follows:—

Law	Science
Catcher	Klein
Lock .....	Pitcher
Klein .....	Crain
Walsh .....	1st Base
Lang .....	2nd Base
Lothman .....	3rd Base
Gelfand .....	Short Stop
Bond .....	Outfield
Gilbert .....	Bennett
	Panos

### Leads Arts Nine

Joh McGraw Urquhart, McGill football star and jovial all-around athlete, who led the Arts Red Sox to victory over Commerce yesterday afternoon in a regular interfaculty baseball contest. Urquhart brought his squad in from Tennessee on Sunday. They meet Science this afternoon.

### Baseball Standing

	Won	Lost
Arts .....	1	0
Commerce .....	1	1
Law .....	1	1
Science .....	0	1

Game Today:—Arts vs. Science.

Erdrich .....

Arts Meet Science

This afternoon in the Montreal High gym, the Arts Red Sox will endeavour to step into the undisputed league leadership when they meet Science.

The plumbers can create a four-cornered should they down the Red Sox. Umpire Erdrich will handle the game which will start at 5.15.

### Aristotle Showed Scientific Method In Biological Role

(Continued from page one)

Han Osler's paper on "Anatomy of Melancholy" gives an account or one of the few worthy books by a layman on a medical subject. Osler's paper on the book, published by the Yale Revue, in 1914, outlined this interesting man's life, and his reasons for writing on such a subject.

The treatise is divided into three main parts, bristling with the brackets which writers in Burton's time loved to use. The first part deals with the cause, symptoms, and prognostics of Melancholy. The second deals with the cure of Melancholy. The third with Love and Religious Melancholy.

Three important digressions appear on Anatomy, on Air Rectified, and on Anatomy, on Air Rectified, and on the Nature of the Spirits.

Throughout his reading Dr. Francis interpolated many amplifying and explanatory remarks.

### Bleacher Notes At Yesterday's Doubleheader

MANAGER Joh McGraw Urquhart, of the Arts Red Sox, was all smiles after yesterday's fracas with the Commerce's. Fred "Silent" left this morning for Oshkosh, but will be on deck for this afternoon's game against Science with several new finds.

JOEY Cohen, stellar Red Sox twirler in his first appearance before local fans this year certainly turned in a fine performance. The erstwhile Joe is well tanned after four weeks in the sun at training camp in Tennessee.

SAILOR Swabey, of the Commerce's, turned out in a new uniform last night. Swabey states that he does not wish to lose his friends through no fault of his own.

PLAYING Manager Howie Baker was absent from yesterday's game. The Commerce manager was occupied in another deal with several new recruits.

THE Law batboy was not seen around. It seems that the legal squad have dismissed him from their services.

"JIMMY" Walsh heavy hitting flash of the Law Lions smashed out three driving clouts during the game. This star has been offered to sign on the dotted line with the New York Giants. At a very handsome figure.

IT is rumored that shortstop "Flash" Gelfand has been insured by the Law Undergraduate Society for \$10,000 owing to the risks that this strong hearted player, takes when he is busy missing the baseball bats that are let fling from the opposing batters.

"DAREDEVIL" Lang, Law second baseman played an excellent game despite the fact that he had two fingers broken in the Commerce game. Aside from fielding a perfect game, he arrived safely four times on the first sack.

"JOHN" Gilbert, of the Law Lions, broke a bat when he clouted out a double in the third inning yesterday.

RESULTS of the Law-Science game were immediately wired to the Nairn, the Gammell and the Millen who were out of town on heavy conference. They celebrated the victory.

"JZ" Cohen, connected with the Law Lions as chief scout, was out looking over the aggregation he had gathered together for the legal owners. He seemed pleased, but it is expected that he will add a few more to the roster in a few days.

### Arts Debating Judges Named

(Continued from page one)

positions on the executive of the Undergraduate Society were called on Monday, and close next Saturday, at 12 noon, March 15th. They must be placed in the hands of Bill Gentleman. The president must be from third year, the vice-president from second year, the secretary from first year, and the treasurer from third year. Nominations must be signed by at least ten members of the Arts Undergraduate Society.

Elections will be held in the Arts Building, on March 26th, the morning after the smoker. In the past few years only a small percentage of the students have availed themselves of the opportunity to vote, but on this occasion the executive will make every effort to raise the figure.

For the will and not the gift makes the giver.—Jessing.

### Track Squads See Movies Of U.S. Champions

First Meeting of Year Takes Place in Physical Education Office

#### WORK STRESSED

With the snow rapidly melting from the cinder path at the Stadium, McGill's trackmen have begun to make preparations for the forthcoming season. Thirty members of the Senior and Intermediate squads attended a meeting in the Physical Education Building yesterday afternoon at which plans were formulated for a summer of action which is to culminate next October in the regaining of the Track Trophy from 'Varsity.

In addressing the track candidates Coach Van Wagner laid special stress on the advisability of getting in as much work as possible during the off-season. The meeting was wound up with the running of two reels of movies showing the winners of last year's United States Intercollegiate Championships in action.

Summer Training

As soon as the snow entirely disappears the Stadium will be open to all comers, whether runners or not. As the coach pointed out yesterday, not too much should be attempted at first; and for those who intend to run in the fall it would be advisable to turn out not oftener than twice or three times a week. Meanwhile the M.H.S. gym is open for use on Mondays, Wednesdays and Fridays, when both basements and connecting passages may be used for sprinting and distance running.

Pictures

The pictures were slow motion "shots" of the American College Champs in action. In the 100 yard dash Wildermuth and Engle raced the distance in 10 flat with Wildermuth just nosing out the Harvard star at the tape. Later in the summer Engle defeated the best sprinters from Oxford and Cambridge.

Phil Edwards accounted for the \$80 in 1.52 1-5 to set a new record. Edwards slow, sweeping stride when seen in slow motion is even more graceful and easy than it appears to be at natural pace.

2 Miles

In the two mile event Jimmy Reid of Harvard led the field home in 9 mins. 22 secs. also setting a new record. He trailed the pack for the greater part of the way, finally cutting loose with a terrific burst to win by a large margin. Reid also defeated the English stars in the International Meet.

The weight men from the Pacific coast were impressive in winning discus, shot and javelin. Rother of Stanford put a new record of 50ft. 3ins. on the books. For the shot the McGill track men were particularly impressed by the style of these men, knowing that each had worked at his event two or three hours per day for three or four years.

Jumps

The high jump went to Ben Hedges, of Princeton with a paltry leap of 6ft. 2ins. This same athlete has often cleared 6ft. 6ins. The broad jump was won with 25 ft.

At the conclusion of the meeting the coach again stressed the importance of getting into some sort of condition before the beginning of the comparatively short season at McGill.

Mac: Has yer son an ear fer music? Mo: Weel, I dinna ken, but he shure gotta good stomach for steak! —Ohio State Sun Dial.

"How'd they discover the idea for these vibrating machines?" "Rode in a collegiate filver!" —Notre Dame Juggler.

### Fencing Notes

A few fencers have been turning out for post-season practice in order to prepare themselves for the Provincial Tournament which is to commence on Wednesday, March 19th. The Tournament will be held in the M.A.A.A. Club-house on Peel Street.

Due to their recent success in the Intercollegiate Assault, the fencers are expected to put up a good fight in the coming fray. McKergow and Harvey-Jellie, who fared so well against 'Varsity and Queen's a few weeks ago, have been working steadily since the Assault and are in fine condition. Wiggers, the new Intercollegiate Champion, has been hampered by illness and academic work and, so, has missed several practice sessions; but his appearance at the work-out on Monday afternoon gave no evidence of any ill effects from this forced rest. In all, ten men have thrown their gauntlets into the ring and expect to compete against some of the best fencers in the Province next week. The McGill representatives will be: Wiggers, McKergow, Harvey-Jellie, Clay, Bolsonnault, deMontigny, Bailey, MacKlater, Crossland, and Modolsohn.

The local fencers were invited to enter the Championship Tournament which is being staged by the Ontario fencers in Toronto next week-end; but none of the Rodmen will be able to accept the invitation due to the proximity of the Province of Quebec Tournament.

## Individual Cup Won By Harris

Infantry Ties With H. Q. and Signals Team For Jenkins Trophy

The annual C.O.T.C. rifle matches fired on Monday evening proved exciting as the result of excellent shooting. The members of the three teams kept the team scores very close during the whole competition. Finally, with only Lieut. Harris of the Signals to shoot, it was determined that if he scored one point less than a possible highest score, his team would tie with the Infantry for the Jenkins Trophy, the team prize. At the same time, such a score would win the individual prize, the Reserve Officers' Cup, by one point.

Under the strain of this knowledge, Lieut. Harris fired carefully, and made the required 49. It is planned to hold the final shooting this evening, following the Annual Inspection.

The scores were:—  
Lieut. Harris 49; Capt. Patton 49; Lieut. Bagg 48; Sgt. Herring 48; Cdt. Chaplin 47; Lieut. Tait 46; B. S. M. Tait 46; Sgt. DuBois 46; Lieut. Pratt 46; Lieut. McDougall 45; B.Q.M.S. Couper 45; Cpt. Grimson 45.

The Teams:  
Headquarters and Signals:—  
Lieut. Harris 49; Lieut. Bagg 48; B.Q.M.S. Couper 45; Cdt. Boyd 45. Total 231.

Infantry:—  
Capt. Patton 49; Sgt. Herring 48; Cdt. Chaplin 47; Cdt. Wiggins 44; Cpl. Sharpe 43; Cdt. Ritchie 43. Total 231.

Cavalry:—  
Lieut. Tait 46; Sgt. DuBois 46; L-Cpl. Pratt 46; Lieut. McDougall 45; L-Cpl. Grimson 45; Cdt. Barnes 45. Total 228.

## Eleven Face Voters For Four Offices

(Continued from page one)

all through his college career been very active in student affairs. He has his B. Sc. in Electrical Engineering, has the A.M.I.E.E., and graduated B.A. at McGill in 1928, and is now in Theology.

He has been on the Students' Council for two years, being the Arts representative in 1927 and as Editor-in-Chief of the Daily during 1929-30. From 1925 he has been on the Managing Board. In the graduation exercises of 1928 he was his Class Prophet and since entering Theology he has been the President of his class for two years.

For three years he was on the Board of Managers of the S.C.A., and for two years was the President of the Old Scout's Club. In creative activities he brought into being The Book Exchange under the Students' Council and was the founder of the League of Nations' Club and the McGill Labour Club, and in turn has been President of each of these.

During the summer of 1929 he was Canadian delegate to the W.S.C.F. Conference in Glion, Switzerland, Canadian representative to the I.S.S. Conference at Krems, Austria, and Canadian representative to the C.I.E. Conference at Budapest in Hungary, all three being international student conferences. At present he is the McGill representative to the N.F.C.U.S. He has featured in the Debating Union Society and also is a member of the Historical Club.

Athletic activities have seen him in many roles. He has represented McGill in Intercollegiate Water Polo honors during the years 1925-6-7-8-9-30 and in Intercollegiate Swimming also. He has played Soccer for Arts and Theology and Basketball for his Theological College.

On the Council he has always been for centralisation, which has been its policy for some years and was shown this year when the Junior Prom and Graduating Committee came under the sphere of the Council. In that outside people have no way of communicating with students of both sexes in a group he advocates a Central Committee, composed of three men and three women, who may deal with such matters as affect them in common, which are many. From his experience as Editor of the Daily he feels that its freedom should be secured, as should that of the executives of all activities sponsored by the Council. He suggests that the holding of student affairs in University buildings, as evidenced by the Red and White Revue coming to Moyse Hall, is a most happy trend. Interesting every student in the University he continues in his principle that intra-mural sports should be given more encouragement by the Athletic Board.

Secretary of Union

There are two candidates for the position of secretary: Russell Call and Robert Picard. Call spent two years in Architecture but changed to Commerce and is now in his third year in that faculty. His activities have been varied. He was manager of the swimming team of 1927-28, publicity manager of the Red and White Revue in 1929, member of the Commerce rugby team for several years and is now a sports reporter on the Daily. The main obligation of the secretary of the Union he thinks, is to co-operate with the other members of the committee.

Joined McGill in 1927 and

## Red & White Revue Notes

The following is the list of ushers for the Revue. Please be at the Moyse Hall at 7:30 sharp and bring a flashlight.

Wed.—Seybold, Wight, French, Murray, Kyle, Webster.  
Thurs.—Seybold, Wight, Burke, Murray, Graham, Forbes, French.  
Fri.—Wallace, Graham, Forbes, Ellis, Burke, Baker, Seybold, Veltch, Sat.—Wallace, Ellis, Baker, Kyle, Webster, Shallcross, Veltch.

The girls who are ushering at the Saturday Matinee are asked to be there at 1:30.

is now in his junior year in Arts. He held the position of chairman of the Book Exchange Committee for the past year and the success of the exchange speaks well for his executive ability. He has as well taken part in class debating and was on the Arts '31 debating team.

### Debating Union

Three students have been nominated for the position of vice-president of the Debating Union: Edmund Collard, Allan Edson and Abraham Klein. Edmund Collard's activities have been mainly centred around debating and public speaking. In 1929 he won the Talbot Papineau Cup for Impromptu debating. He has been a member of Intercollegiate Debating teams, speaking against Bishop's College and was successful in both encounters. He was on the executive of debating societies in both High School and in his class in college, as well as on the executive of the McGill Debating Society. His platform is as follows: To avoid dry formalism and rosy buffoonery; to avoid a monopoly by a few good speakers; but to give these ample opportunity for wide training in matching their powers with outside debaters; and to give every student at the university an opportunity to acquire by direct practice the art of putting ideas over.

Allan Edson entered McGill in 1927. He is now in his third year in Arts of which he is vice-president. He is vice-president of the Debating Union and has taken an active part in class debates. Edson was a member of the heavy eight rowing team which competed in the Canadian Henley this summer. He is taking part in the Red and White Revue as well.

Edson believes that the success of the Debating Society rests with the students, and that the interests of the increasing number of class debating societies should revolve about the Debating Union.

Abraham Klein entered McGill in 1926 and since has acquired a reputation as a prominent debater and public speaker. He has taken an interest in almost every debating society in the university. He now holds the position of secretary of the Debating Union. Klein has been a member of University debating teams for several years in the past, in which he has been in the most part successful. This year he debated at the Columbus Forum and was successful in gaining the decision. Klein has been outstanding in debates in the Union and has also spoken at the Macca-baeon Circle.

Athletic Representatives  
Four candidates have been nominated to fill the positions of representatives to the Athletic Board: Charlie Littlefield, Ross Paterson, Bill Seljar, and Fred Urquhart. These four men are all prominent in athletic affairs.

Littlefield is known to all as the captain of McGill Senior Rugby team, an honour which he has held for two consecutive years. He is a

student in the Faculty of Medicine and held the position of secretary of the Medical Undergraduates Society last year.

Ross Paterson entered McGill in 1925, matriculating from Lower Canada College. He was manager of the championship rugby team in 1928 and was last year elected to the position of representative on the Athletic Board.

Seljar entered McGill in 1928 and during the past two years has been prominent in athletics, both in playing on rugby and basketball teams and in sport writing for city newspapers.

Fred Urquhart is a student in fourth year Arts. He has played on almost all of the Senior teams. He was on the Senior rugby team in 1928 and 1929 and has thrown the javelin on the track team and the Intermediate Hockey team in 1928-29. He has taken part in other student activities as well as in athletics.

## Bill Would Help Tourist Trade

(Continued from page one)

Freidman, the last speaker for the negative, showed that barely one fifth of the liquor in the United States came from Canada. Experiences of the past have shown that the United States, when afforded the same opportunity as Canada has absolutely refused to do anything in the matter. Why then should Canada help that country to keep its laws. The decision was given to the affirmative.

In the first speech, Crabtree gave an account of a trip he took last summer from Montreal to Vancouver and back by car with another student. Despite blizzards and engine trouble the trip was made in record time.

Smells portrayed vividly the life of a forest ranger. His own experience as a ranger, 125 miles south of James Bay added a personal touch to the picture. Saunders gave an economic version of the immigration and unemployment question.

Allison outlined the necessary qualifications of a good salesman. Truth win out more often than unsubstantiated facts. Public speaking is a great aid to the future successful salesman.

Allan Edson acted as critic for the meeting. His many helpful hints on public speaking were appreciated by the club.

## Stresses Value Of Discoveries

(Continued from page one)

less, and of the radio of to-day. He succeeded in transmitting signals through a space of more than half a mile, more than had ever been accomplished before.

His later work was almost entirely taken up with the study of radioactive substances. He made many discoveries in connection with uranium, thorium and the three rays, given off by these substances after undergoing certain chemical changes, and in fractional distillation. These three rays are known as the Alpha, Beta, Gamma rays after the first three letters of the Greek Alphabet. He made many clever experiments with the Alpha rays, and one of his most famous discoveries was his plotting of the Decay and Rise Curves of Thorium and Uranium compounds. As a result of these experiments he formulated his famous theory, "Atoms break up at a rate proportional to the number present."

Throughout the lecture, Dr. Eve performed many delicate and intricate experiments illustrating the work of Rutherford. In addition to this, numerous slides were shown. Several pieces of the original apparatus that Rutherford used, were exhibited.

student in the Faculty of Medicine and held the position of secretary of the Medical Undergraduates Society last year.

Ross Paterson entered McGill in 1925, matriculating from Lower Canada College. He was manager of the championship rugby team in 1928 and was last year elected to the position of representative on the Athletic Board.

## Notices

Notices must be legibly written and be in the McGill Daily office before eight o'clock on the night previous to publication. Brevity is essential. Under no circumstances will notices be accepted over the telephone.

### MCGILL UNIVERSITY MASONIC CLUB

A supper meeting of the McGill University Masonic Club will be held in the McGill Union on Wednesday, March 12, from 6:15 to 8 P.M. Officers for the next year will be elected at this meeting.

The speaker for the evening will be the Hon. Pres. Professor H. De L. French. The subject will be "Some Thoughts on the Craft." As this will be the final meeting for this year, a large attendance is desired.

THE EVANGELICAL CHRISTIAN UNION OF MCGILL cordially invites men and women students to a meeting to be held in the music room of the McGill Union on Thursday, March 13, at 8 o'clock. The speakers will be Mr. F. N. Palmer B.A. (Oxford), Mr. Kenneth Hooker B.A. (Cambridge), and Mr. A. J. Nesbitt.

### S.C.A. NOMINATIONS

Nominations for the Board of Directors of the Student Christian Association of McGill University will be received by the General Secretary in Strathcona Hall until March 13th, 1930.

Nominations may be made by any five active members and must be presented in writing.

### S.C.A. OF R.V.C.

The weekly Cabinet Meeting will be held Thursday at 1 o'clock.

### S.C.A. OF R.V.C.

Nominations for next years officers on the Cabinet have been posted on the Notice Board in the Arts Common Room. Any further nominations should be in the hands of Eloise Ilsey by Thursday noon. The election of officers will take place at 5:30 on March 20th, just before the Annual S.C.A. Meeting.

### LABOUR CLUB

The McGill Labour Club will hold its last meeting for this session on Tuesday, March 18th, at 8 p.m. in Strathcona Hall. Dr. Gifford will speak on "War and Peace." Election of officers for next year will take place.

### GLIDER CLUB

A meeting of members of the Glider Club will be held at 5 o'clock Thursday in the Engineering Building. All members must attend.

### MONTREAL LECTURE

Dr. T. H. Clark, Associate Professor of Paleontology will speak before a meeting of the South Shore Teachers Association this afternoon in the Longueuil High School on "Montreal Through the Geological Ages."

### PHYSICS

"THURSDAY COLLOQUIUM"  
On Thursday, March 13th, in Room 210, Macdonald Physics Building, at 5 P.M., Mr. L. E. Howlett, M.A., will give the twenty-second special graduate lecture of this session on "The Raman Effect." (This is the only lecture on this subject.)

These graduate lectures will be open to all those who are interested.

### PHILOSOPHICAL SOCIETY

There will be a meeting of the above society tonight at 7:30 in room 20 of the Arts Building. The subject

will be Walter Lipman's "Preface to Morals."

### Lost

A Green Sheaffer pen in Room 20 of the Arts Building. Finder please leave with Bill Gentleman.

A fountain pen on Friday afternoon in Lecture Room, 3184 University. Return A. Champagne, first year Law.

Will the gentleman who borrowed a Field Service Regulation Book 2 from the C.O.T.C. exam room yesterday kindly return same to Harry in the Engineering Building or Bill in the Arts Building.

Black gown, which was left in Hyland's Office to be given to its owner last Thursday afternoon was taken by some person, presumably by mistake. This gown had the initials K. B. D. inside. Please return to Hyland's Office.

Will the person who removed a brown overcoat from the top of locker 223 in the Arts Building, please replace same. No questions will be asked.

A red leather envelope purse in R.V.C. or between there and the Arts Building. The purse contained a yellow Duofold fountain-pen, silver eversharp, coin-purse, keys, etc. Finder please return to Hyland's Office or call Cl. 5104.

Bunch of keys, among them Locker Key No. 862, in brown leather case. Kindly leave with Bill Gentleman.

Organic Chemistry Chart, in two parts. Extremely valuable to owner. Please leave with Bill Gentleman.

Economics text-book bearing the Magd. Finder please return to Bill Gentleman's office in the Arts Building.

On Friday night either in or between the Arts Building and the Union, a Waterman's pen and pencil with single gold band and engraving thereon. Will the finder please return same to Bill Gentleman and leave his name with them.

About a week ago from Strathcona Hall, a black loose-leaf note book containing Chemistry notes. Finder (?) please return to the office in

Strathcona Hall, or if the note book is in too good shape to return kindly return the notes and the chart, as they are of great value to the owner and of no value to any one else.

On Tuesday afternoon in the washroom of the R.V.C. gold half-hunter watch with black leather strap. Finder please return to Mr. Hyland at R.V.C.

Brown and black mottled Waterman's eversharp pencil in the Arts Building or on the campus. Please return to Bill Gentleman.

Bunch of keys in black case. Finder please leave with Bill Gentleman.

### Found
